Guidelines for Use of the Graphics Lab

The primary purpose for the existence of the Dearborn Schools' Graphics Lab is to provide graphic services for the instructional programs in the Dearborn Public School District.

The operating philosophy is one of "self-help". The Graphics Specialist is employed to assist Lab customers with producing classroom related material and to maintain equipment and inventories.

Because school-related groups (such as the P.T.A. and parent classroom helpers) contribute to and support the instructional program, such groups are also entitled to use the services of the Graphics Lab when they are producing material directly related to the school program.

Other groups and individuals are not entitled to use the services of the Graphics Lab except in instances when they are working cooperatively with Dearborn Schools to produce material to enhance the educational program.

NOTE: Graphics Lab services may not be used to produce materials for religious instruction or for profit-making situations. It may, however, be used for fundraising activities for schools and school related extra-curricular groups.

The following groups are generally **NOT** entitled to use the services of the Graphics Lab:

1. Private individuals
2. Private preschools, nurseries, or other childcare organizations
3. Service clubs and civic associations
4. Political organizations, candidates or their representatives.
5. Businesses or any "for profit" ventures.

If you have any questions regarding the interpretation of these guidelines, please call.
