Dearborn, MI 48126

Dear Mr. Kent

Congratulations, your Automotive/Diesel program meets the requirements for the Technical Education Institutional Grant program at Universal Technical Institute (UTI)!

Your program has proven to be an excellent source of education, knowledge and skills. Through our Technical Education Institutional Grant program, your students can earn advanced placement credit in Universal Technical Institute's Automotive/Diesel Program, which may result in an institutional grant or, with a passing score on the APO tests, reduce their tuition and program length. The goal of the program is to reward students such as yours for their hard work while attending your program and to ultimately help them achieve their career goals and make their dreams reality.

Your program is one to be proud of and you can feel confident knowing you have helped make a difference in your students' lives by providing them such a superb opportunity. UTI is committed to helping your students pursue their career goals as they move on to their postsecondary education. By providing such an excellent foundation, you have helped pave the way to your students' future success. UTI would like to help them on the rest of their journey.

Again, congratulations on your achievement! We are very excited about our relationship with a top-notch program such as yours at Fordson High School. Together, we can help your students achieve their career goals while doing something they love.

Sincerely,

Michelle Lawler  
Vice President of Admissions Operations
