## Professional Development that Sparks Passion for Teaching

Getting Started With

In Your Classroom

### Science, Technology, Engineering, and Math (STEM)

STEM is a necessity for students to succeed in the future workforce; as it will be dominated by highly skilled positions which will focus on math, science, engineering, and technology.

### Addressing Attention Deficits in the Classroom, Grades K-12

### Anti-Bullying: Guiding Girls Through Relational Aggression, Grades K-12

## Online courses include topics such as:

- |                       |                                 |                         |
|-----------------------|---------------------------------|-------------------------|
| 21st Century Learning | Deepening Learning              | Mathematics Instruction |
| Anti-Bullying         | English Language Arts           | Special Education       |
| Classroom Management  | English Language Learners (ELL) | Student Engagement      |
| Common Core Standards | Gifted                          | Teacher Effectiveness   |
| Danielson Framework   |                                 |                         |

All of our online courses are approved by the Michigan Department of Education in partnership with our local partner Oakland Schools. Earn **50 State Continuing Education Clock Hours (SCECHs)** toward the 150 needed for the renewal of your Michigan Teaching Certificate.

We also offer Graduate Credits through our partnership with **Andrews University** which can be applied towards your State License Renewal, Salary Advancement or Continuing Education needs.
