

FOOD DRIVE

**Feeding the
Community**

Thru Next Friday

Ms. Consiglio says, “Let’s do the math”!

During the holiday season food drive, all 548 students at O. L. Smith Middle School *could generously donate at least 1* canned good or other nonperishable food item. If this occurs, how many total items will be collected during the drive? Show work; include units!

$$548 \times 1 = 548 \text{ food items}$$

WOW! That'd be awesome!
